

Table of Contents

Executive Summary	S-1
1: Community Character and Needs	1-1
1.0 Introduction	1-1
1.1 Community Character Assessment	1-2
1.1.1 Regional Context	1-2
1.1.2 Land Use Trends in Southeast and Putnam County	1-3
1.1.3 Putnam County Phase I Planning Analysis	1-7
1.1.4 Land Use Types in the Town of Southeast	1-10
Residential Uses	1-10
Commercial Shopping Districts	1-11
Commercial Office and Industrial Districts	1-12
Open Space and Agricultural Uses	1-13
Community Facilities	1-13
Schools	1-15
1.1.5 Transportation	1-16
1.1.6 Community Character Summary	1-16
1.2 Planning for Future Development	1-17
1.2.1 Comprehensive Plan	1-17
1.2.2 Inter-Municipal Issues	1-17
1.2.3 Transportation	1-17
2: Water Quality Problem Areas	2-1
2.0 Introduction	2-1
2.1 Water Quality Problem Areas	2-1
2.1.1 Pollutants of Concern	2-1
Phosphorus	2-1
Coliform	2-2
Total Suspended Solids	2-2
2.1.2 Lakes and Reservoirs in the Town of Southeast	2-2
Bog Brook Reservoir	2-3
Brewster Pond	2-3
Croton Falls Reservoir	2-3
Diverting Reservoir	2-4
East Branch Reservoir	2-5
Haines Pond	2-6
Lake Tonetta	2-6
Middle Branch Reservoir	2-6
Muscoot Reservoir	2-7
Peach Lake	2-8
2.2 Water Quality Trends	2-8

2.3 Sources of Contamination	2-8
2.3.0 Focus Areas	2-8
2.3.1 Septic System Focus Areas	2-9
2.3.2 Point Source Discharges	2-9
2.3.3 Non-point Source Discharges	2-13
Wastewater Treatment Plant Service Areas	2-13
High Density Residential Focus Areas	2-13
Commercial Focus Areas	2-13
Other Non-Point Sources	2-13
2.3.4 Stream Bank Stabilization	2-18
2.3.5 Summary of Existing Water Quality Conditions	2-18
2.4 Assess Future Water Quality Impacts	2-18
2.4.1 Summary of Town-wide Diversion Report Calculations	2-18
2.4.2 Water Quality Effects of Growth Consistent with the Town’s Comprehensive Plan	2-22
3: Recommended Investments to Address Water Quality Problems	3-1
3.0 Introduction	3-1
3.1 Diversion of Wastewater	3-1
3.1.1 Benefits of Diversion to Community Character	3-2
3.1.2 Diversion and Point-source Discharges	3-3
3.1.3 Diversion and Septic System Focus Areas	3-3
3.1.4 Diversion Recommendation	3-4
3.2 New or Expanded Waste Water Treatment Plants	3-11
3.2.1 Phosphorus Offsets	3-12
3.2.2 Diversion Credit Program	3-13
3.3 Stormwater Management Districts	3-16
3.3.0 Stormwater Impacts on Water Quality	3-16
3.3.1 Stormwater Management Areas	3-16
3.4 Designated Village Center	3-18
3.4.1 Village Center Delineation	3-18
3.4.2 Village Center Definition	3-18
3.5 Community Septic Systems	3-18
3.6 Sewer Extensions	3-19
3.6.1 Benefits of Sewering Septic Focus Areas	3-19
3.6.2 Sewer Extensions and Community Character	3-19
3.7 Acquisition of Open Space	3.20
4: Comprehensive Plan and Zoning	4-1
4.0 Introduction	4-1
4.1 Community Character and Water Quality Impacts from Directing Growth Away From Areas Where New WWTPs are Prohibited	4-1
4.2 Updated Comprehensive Plan	4-2
4.2.1 Natural Resources	4-2
4.2.2 Land Use and Community Character	4-3
4.2.3 Housing	4-4
4.2.4 Economic Development	4-5
4.2.5 Traffic and Transportation	4-7

4.2.6 Community Facilities and Services 4-8

4.3 Revise Comprehensive Plan and Zoning 4-9

5: Local Environmental Laws 5-1

5.0 Introduction 5-1

5.1 Steep Slopes 5-1

5.2 Wetlands 5-1

5.3 Local Environmental Laws 5-1

6: Local Land Use Approval Process 6-1

6.0 Introduction 6-1

6.1 Subdivision Regulation 6-1

6.2 Zoning Code/Site Plan Review 6-1

Endnotes E-1

List of Tables

1.1-1	Generalized Land Use Trends: Town of Southeast and Putnam County	1-4
1.1-2	Land Use in Southeast, 1993 and 2000	1-5
1.1-3	Population Trends in Putnam County	1-6
2.3-1	Phosphorus Loading from Septic System Focus Area	2-10
2.3-2	Wastewater Treatment Plants	2-11
2.3-3	Phosphorus Loading from Wastewater Treatment Plants and Service Areas	2-12
2.3-4	Phosphorus Loading from High Density Residential Focus Areas	2-14
2.3-5	Phosphorus Loading from Commercial Focus Areas	2-15
2.3-6	Major Roads	2-16
2.3-7	Sand/salt Storage Facilities	2-17
2.3-8	Existing Junk Yards	2-18
2.3-9	Total Current Phosphorus Loads in Southeast	2-19
2.4-1	Current and Projected Phosphorus Loads WWTPs and Focus Areas	2-21
2.4-2	Growth Focus Areas	2-22
2.4-3	Current and Projected Phosphorus Loads from WWTPs and Growth Focus Areas	2-23
3.1-1	Growth Focus Areas	3-2
3.1-2	Projected Phosphorus Loading from Septic System Focus Areas	3-5
3.1-3	Current and Projected Phosphorus Loads WWTPs and Focus Areas	3-6
3.1-4	Necessary Non-point Phosphorus Reductions Assuming WWTP Upgrades	3-7
3.1-5	Necessary Non-point Phosphorus Reductions Assuming Flow Diversion	3-8
3.1-6	Surface Runoff Phosphorus Loads	3-10
3.1-7	Required Non-point Source Reductions	3-11
3.1-8	Wastewater Treatment Expansion Options for WWTPs	3-14
3.1-9	Wastewater Treatment Expansion Options for Focus Areas	3-15

List of Figures
