Subject: 2019 NYSEG Routine Tree Trimming Maintenance
Attachments: Town of Southeast Roads.xlsx

Hello Supervisor Hay and Mr. Bruen,

NYSEG will be doing routine tree trimming maintenance in your town. Nelson Tree Service is the contractor who is doing the work. The tree work will be done is on the Dingle Ridge 277. The specification for the tree crews, which has been approved by New York Public Service Commission, is to trim or remove trees and vegetation to get a clearance of 10 feet to the sides of the primary lines, 15 feet above the primary lines and 10 feet below. Please be aware trees outside that area are the individual landowners responsibility to address. I should also note that debris less than 6 inches in diameter in a yard area is chipped and hauled away. In a wooded area the debris smaller than 6 inches in diameter could be lopped and scattered and left to naturally decompose which would not be higher than 2 ft. Any wood that is larger than 6 inches in diameter is left in segments ranging from 16 inches to 4 feet. In a yard area it would be neatly stacked in a wooded area it would be left cut into segments where it fell. I have included a list of roads for the circuits we are working. Please feel free to reach out to me with any questions you may have.

Regards,

Samuel Miller
