I was thinking that the Proswing needs to have some permanent structure dedicated to Safety/ Medical uses. I understand that an Emergency Vehicle on hand with EMT's is important. Especially for the broken this or that, or the occasional heart attack. But they will need a place for the people that overheat. The Pitchers who come off the mound who need to ice their arms. A place centrally located with a medical sign above it where kids can be wrapped from their road rash, or just get a bandaid or an ice pack.
